

## 《 Ecolovy Balloon Helium Gas Chart 》

Updated : June 1, 2009

Balloon Type	Dimensions After Inflated Width x Height	Helium Capacity (approximate)	Buoyancy (approximate)	Amount Inflatable per 7000 liter Tank
Dove	800mm x 350mm (31.50in x 13.78in)	20 liters	2g (0.07oz)	Approx 350
Angel	860mm x 370mm (33.86in x 14.57in)	22 liters	7g (0.25oz)	Approx 310
Round	300mm x 300mm (11.81in x 11.81in)	12 liters	5g (0.18oz)	Approx 580
Star	440mm x 410mm (17.32in x 16.14in)	12 liters	6g (0.21oz)	Approx 580
Face	300mm x 400mm (11.81in x 15.75in)	6 liters	2g (0.07oz)	Approx 1160
Koi Carp	600mm x 372mm (23.62in x 15.65in)	20 liters	12g (0.42oz)	Approx 350

The above information applies to temperatures of 35°C(95°F).

Celsius and a barometric pressure of 150.

Actual results will vary with weather and atmospheric pressure.

To avoid not having enough helium, please plan to have more than the exact amount necessary.
